

SolderSmart®

Version In-Line^{New}

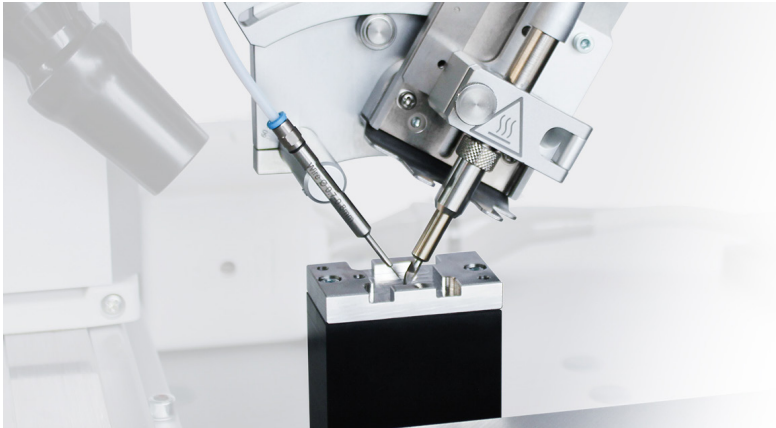

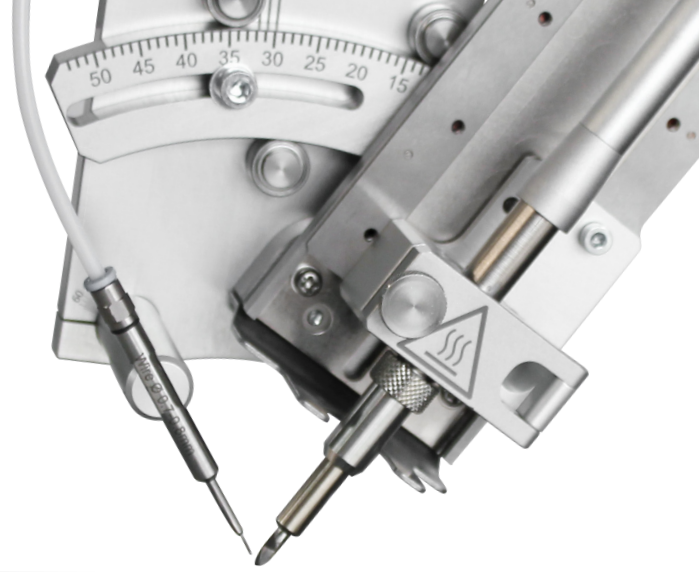

Integration of a tested
and proven system

Traceability & process
monitoring

Independent
from feeding
system

SolderSmart® InLine^{New} is a compact piston soldering robot at a reasonable price for the automation line.

Fast integration of a proven system

Features and advantages

- › SolderSmart InLine contains the features and possibilities of complex automated soldering systems.
- › Flexibly adjustable height (depending on your production line)
- › Independent of the feed (e.g. conveyor belt)
- › Central setting and monitoring of all parameters
- › Spot- & drag soldering can be combined in a single process
- › Simple and intuitive teaching (e.g. by arrow keys)
- › Process monitoring and traceability
- › Automatic soldering tip measurement
- › Automatic zero point calibration
- › Electric only system
- › Worldwide online support & training
